BHARGAV SELLAM

2 Lockside Place, Coventry, CV1 4LX

seelambhargav2001@gmail.com +44 7717495387 LinkedIn: Bhargav Sellam

EDUCATION

2026– 2027 MRes in Computing *l Birmingham City University, United Kingdom*
Currently Pursuing
2018 – 2022
Bachelor of Technology in Computer Science & Engineering *l BVCITS Institute of Technology & Science, India*
First Class (Distinction)
2016 – 2018
12th Grade *l Aditya Inter College, India*
First Class (Distinction)

WORK EXPERIENCE

26/09/2023–19/01/2026 - **LTIMindtree** | *Hyderabad, India*
System Engineer

- Designed, developed, and maintained CI/CD pipelines using Jenkins, enabling automated build, test, and deployment workflows for multiple applications. Implemented pipeline stages for source code checkout, dependency management, testing, and deployment, ensuring faster and more reliable releases.
- Collaborated closely with development, QA, and operations teams to coordinate build schedules and deployment activities. Streamlined deployment processes and reduced overall release cycles by 30%, improving delivery efficiency and team productivity.
- Identified, assessed, and mitigated release risks by proactively monitoring pipeline failures, environment issues, and configuration mismatches. Resolved critical blockers impacting scope and quality, contributing to a 15% reduction in overall project delivery timelines.
- Troubleshot complex CI/CD, infrastructure, and application-level issues, including build failures, environment inconsistencies, and deployment errors. Provided timely support to development teams, resulting in a 25% reduction in system downtime.
- Built end-to-end CI/CD pipelines to support Continuous Integration and Continuous Deployment best practices, ensuring consistent code integration, automated testing, and repeatable deployments across multiple environments.
- Onboarded and trained new team members, granting appropriate access to tools and repositories while sharing project documentation and workflows. This structured onboarding approach reduced ramp-up time by 40% and improved team collaboration.
- Managed organization-level and project-level settings across DevOps tools, ensuring correct role-based access control (RBAC), secure permissions, and compliance with internal governance policies.
- Supported application migration to OKD (OpenShift Kubernetes Distribution) by assisting in containerization, deployment configuration, and environment validation. Worked with teams to ensure minimal downtime and smooth transition to container-based platforms.
- Managed source code repositories using GitHub, enforcing branching strategies, pull request reviews, and version control best practices. Automated build triggers based on code commits to maintain continuous integration workflows.
- Integrated SonarQube into CI/CD pipelines to perform automated static code analysis, track code quality metrics, and identify vulnerabilities. Helped improve coding standards and reduced technical debt through early detection of issues.
- Implemented and supported AWS cloud infrastructure solutions, including EC2 for compute, VPC for networking, ELB for load balancing, IAM for secure access management, and Auto Scaling for high availability and scalability.

06/05/2022 –24/06/2022 - **LTIMindtree** | *Chennai, India*
Internship

- Completed Industrial Training in DevOps, gaining hands-on experience with CI/CD pipelines, version control, cloud infrastructure, and industry-standard DevOps tools.
- Delivered a milestone project by applying DevOps best practices, implementing an end-to-end CI/CD pipeline to automate build, test, and deployment processes.
- Worked on real-world deployment scenarios, troubleshooting pipeline and environment issues, and documenting solutions to ensure successful project delivery.

PROJECTS

High-Inference, Multi-Theme AI Chatbot
Python, Flask, JavaScript, Groq API

- Architected and deployed a high-performance LLM chatbot using Flask and the Groq API, leveraging the Llama-3.3-70b-versatile model to achieve ultra-low latency inference for complex natural language tasks.
- Engineered custom prompt workflows and context-aware responses, integrating Groq's high-speed processing with a Flask backend to deliver a seamless, scalable, and responsive user experience.
- Implemented a robust error-handling and logging system within the Flask backend to monitor API consumption and ensure 99.9% uptime during high-concurrency request cycles.
- Integrated a secure environment-variable management system using python-dotenv, preventing sensitive Groq API keys from being exposed while streamlining transitions between local development and production environments.

TypeScript-Powered Learning Management Interface
TypeScript, JavaScript, HTML, CSS

- Engineered a high-performance Learning Management Interface using TypeScript and React, implementing strict type-safety to reduce runtime errors and ensure a robust, scalable codebase.
- Developed a responsive, user-centric UI with Vite, optimizing asset loading and component architecture to deliver a seamless educational experience across multiple device types.
- Optimized application state and data flow to handle complex user interactions, ensuring real-time interface updates and a lag-free experience during heavy educational content rendering.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, C#, TypeScript, HTML, CSS, SQL, R
Frameworks & Libraries: Django, React, NextJS, Flask, LangChain, Pandas, Numpy, Matplotlib
Cloud & Distributed Systems: AWS (ECS, Lambda, DynamoDB, SQS), Azure, Kubernetes, Docker, CI/ CD
Databases: PostgreSQL, MySQL, NoSQL, Oracle, MongoDB
Tools & Platforms: Git/GitHub, GitOps, Selenium, Postman, GraphQL, Jira, Splunk, Tableau, Unix/ Linux, UI/ UX

CERTIFICATION & VOLUNTEER WORK

- Cleared AWS Cloud Practitioner Certification (CLF-C02)
- Cleared GitHub Fundamentals Certification
- Cleared GitHub Actions Certification
- Cleared GitHub Copilot Certification
- Cleared Python Problem Solving Certification
- Student Election Comission Volunteer
    - Assisted in coordinating polling booth activities, including voter queue management, verification support, and ensuring orderly conduct of the voting process in accordance with Election Commission guidelines.
    - Supported election officials with administrative and logistical tasks, such as distributing voter slips, maintaining basic records, guiding voters, and promptly reporting issues or irregularities to senior officers.
    - Facilitated real-time communication and reporting between polling stations and central headquarters, ensuring that logistical bottlenecks and procedural queries were resolved within minutes to maintain continuous voting flow.
    - Demonstrated high ethical standards and neutral oversight while monitoring sensitive polling areas, successfully managing crowd dynamics and de-escalating minor voter disputes to uphold a peaceful and transparent election environment.
